WORK EXPERIENCE

AGILf(x)

Software Engineer   May 2025 - Present

- Developed full-stack applications by leveraging Agentic AI.
- Worked on an Insurance marketplace application that uses the reverse auctioning concept to fetch the candidates the best insurance premium-to-coverage from various agents, with **Stripe**, **Twilio**, **Google Maps API**, and **OpenAI** API integrations.
- Worked on a stress management system developed in **NextJS** and deployed on an **AWS** stack with a native Android and iOS app developed via Capacitor with functional **in-app purchases** using **RevenueCat**.

Hair Drama Company

Software Developer Intern   April 2025 - August 2025

- Developed Internal tooling and various automations for the operations and warehouse teams by **leveraging AI** for quick **MVPs** and then conventional coding for well-architected and long-term solutions for the same.
- Saved **$600+** in costs per month by developing a tightly integrated label printer with the cataloging webapp, which saved the warehouse team **30+** hrs of labour every week.
- Also developed a procurement solution from scratch to meet the unique requirements of the team with integration to the cataloging webapp while maintaining a stable architecture that tracked over **$30,000** worth of purchases per month.

BizzAppDev Systems Pvt. Ltd.

Python Intern   July 2023 - January 2024

- Maintained ERP applications by developing business logic in **Python** and maintaining the existing codebase by updating the documentation. Also, created unit tests for legacy modules.

PROJECTS

Transformer Designer ↗   July 2024 - Present
- A work-in-progress full-stack app with **Java Spring Boot**, **React.js**, and **JWT** authentication.
- Visualized the Transformer CAD designs using opencascade.js and Three.js.

Pirate Companion ↗   July 2024 - July 2024
- A Discord Bot for users' assistance to travel the high seas of the interwebs with minimal risk.
- Built a scalable web scraper with **Python** and BeautifulSoup, optimized for minimal-token responses.

To-Do ↗   December 2024 - December 2024
- Developed using classic **HTML** and **CSS** that is without using any JSON responses or requests
- Supports CRUD operations with the Backend in **Django** and **Supabase** database. Briefly deployed on **Vercel**.

SKILLS

Languages:
- TypeScript, JavaScript, Python, PostgreSQL, MongoDB, Bash, Java.
